PROJECTS

ESG MANAGEMENT SYSTEM

ESG is an acronym for Environment, Social & Governance. ESG application helps its' belonging organization with automating data collection and managing reporting frameworks for ESG initiatives. This application is being developed following microservice architecture using Java Spring Boot, ASP.NET Core and Angular. For reporting an Open-Source application named 'SuperSet', which is developed by python and react, is being used.

APPROVAL MANAGEMENT SYSTEM

I have developed an automated approval system for my current company where all kinds of approval of the company is managed digitally and dynamically. MS SQL, .Net 5 and jQuery are used to develop this application. Software architecture, Design pattern have been used for the development of this software. Also, the deployment and maintenance of this application is managed by me.

WORKFLOW MANAGEMENT SYSTEM

A Workflow management system named OPUS was developed for serving its' client to handle the operational workflow and to make a communication hub for them for the betterment of the business requirements. This system is developed in ASP.NET MVC, jQuery. For the data management MS SQL Server is being used. 3 modules of this application have been developed by me and 1 module had been supervised by me.

"INSTAFOREX" WEB SERVICE

I have been developing Web services following the RESTFUL WEB Service rules for different types of mobile apps. In 'Crypto Learn' App which is under development, several kinds of APIs have been developed by me. I have also created a 'Help' page for documenting the APIs, I've created. I have also worked in an app called 'Forex Course' which have 100000+ installation in play store. Before that I had worked in a client portal of 'InstaForex' where I had worked in .net Web form. Currently, I am working in a project where I am developing web services using ASP.net Core.
